

Network Analysis & Improvement Plan

Network Analysis & Improvement

CostDown Consulting directs the analysis, obstacle identification and solution development of your freight and operations network to measurably improve Driver Productivity and Revenue per Mile performance.

PROGRAM OVERVIEW

- Identify general obstacles; develop and manage data collection process
 - Analyze, classify and prioritize obstacles
 - Review Findings and Recommendations to Executive Group
 - Propose and Develop Network Solutions, SOPs and Timelines
-

PROGRAM SUMMARY

CostDown Consulting works directly with the Executive Group, Driver Managers and Terminal Managers to:

Data Collection	Using key employee interviews, identify general obstacle categories and develop Network Issues and Recommendations log. Write instruction set for logs and manage distribution and collection of logs to appropriate employees.
Analysis, Obstacle Ranking & Improvement Draft	Review individual logs for completeness. Contact employees for clarification where needed. Analyze logs, group by category, prioritize obstacles and recommendations, define Internal (company) and External (customers) Obstacles and review Network Analysis Draft with Executive Group.
Solution Development	Work with Executive Group to develop obstacle solutions, SOPs, timelines, resource needs and supporting employee and customer communications. Internal Obstacles are resolved where possible and External Obstacles lists are assigned to marketing personnel for resolution with customers.

CostDown Consulting's Network Analysis & Improvement Plan measurably improves Driver Productivity and Revenue per Mile by identifying and removing performance obstacles.
